Correction.

I Claim by using mother nature's natural cocain as a finished product and freebasing it with baking soda (other agents that can be used are ammonia, and ether) which was used in the cooking process, except for ammonia, a product was arrived at that was vastly different chemically from the original cocain that now has a killing effect on tumors by disrupting its abnormal chemistry, when this new substance is vaporized by further heating it so that a final chemical change has taken place and taken in by a sedated patient it is instantly absorbed in the blood and reaches every where especially the brain in ridding it of tumors if they are there, by performing my procedure with its proper timing, duration and volume, and weight that is mention with the use of existing hospital equipment by qualified personnel. When every thing is working together a cure will come about! No surgery or radioactive material is needed for such a cure. Brain tumors are associated with different body diseases depending on what nerve net work in the body it has access to, directly or indirectly. Asthmatic tumors have access to the respiratory system in giving breathing problems. I have cured my asthma that I was born with, with my procedure approximately 15 years ago with no occurrences to date and claim it was a brain tumor in causing such difficulty in my breathing for 55 years. The cure for all tumors lies in the ingredients of cocain and its chemical changes that was brought about and must be applied in a systematic way to such tumors especially to metastasis tumors. If my procedure is not

effective on other body tumors as it is on brain tumors then the magic bullet must be isolated from this cocaine with its own injective procedure that will correlate my original procedure.
